

Capturing Summer

©sylvia naylor

Picture a beautiful hanging about 9in wide by 30in long decorated with flowers. All you have to do is come to this workshop.

We will begin by choosing a suitable background fabric which will then be made more exciting by adding bits of metallic threads over which is laid a fusible web. Flowers shapes will be cut petal by petal from fabric and then placed on the webbing. The fabric sandwich will be completed with organza. Free motion machine embroidery will unite the layers and more importantly define and embellish the flowers. Designing with shapes will be included in the workshop.

Requirements: A working knowledge of free motion machine embroidery.
A sewing machine with which you are familiar
